

Patras Science Park (PSP) is one of the six Science and Technology Parks (STPs) established in Greece back in the early 90s under the auspices of the General Secretariat for Research and Technology (GSRT).

Scope: provide high quality infrastructure as well as co-shape the appropriate financial and social conditions that will support and promote the creation, operation and development of innovative firms. Its activities include among others technology transfer building, innovation support and entrepreneurship strengthening.

SERVICES:

Hosting Space, Suitable Facilities, Conference Room, Meeting Rooms, Business Community, Networking, Mentoring, Training, Innovation Funds, External and International Collaborations, Secretarial & Accounting Services, IP Advice, Business Support

Fields: **ICT** **Bio** **Nano** **Energy** **Aeronautics** **Food**

ACTIVITIES

Technology Transfer Office:

Bringing the productive sector closer to academia, research institutions and research organizations.

Community Building:

PSP connects startups with world-leading universities, industry or public sector organizations and Embassies giving them access to strategic partners, funding opportunities and experts through training, workshops, events and guest lectures.

Orange Grove:

PSP supports Orange Grove which is a flexible workspace and pre-incubator for young entrepreneurs aspiring to become a catalyst for the development and growth of the startup ecosystem in Greece.

Proof of Concept:

The aim of the program is to annually support 10 scientific / research ideas, up to € 50,000 each, to mature and commercially exploit products by scientists or to create new enterprises.

Industrial Property Organization:

PSP hosts the Industrial Property Organization Regional Sub-Offices which operates as a local contact point for IP protection, Patents at National and International level etc.

CERN's Business Innovation Center (BIC):

PSP is the entry point of CERN in Greece with the aim to provide support to new entrepreneurs to exploit technologies developed by CERN and to create new products and services.

Innovation HUBs:

PSP has established 8 Innovation HUBs in selected research and technology sectors where the region presents characteristics of research excellence.
